- auto size detection
- auto roll switching

A quick look:

- Three 'D' size prints per minute
- Fastest RIP speeds on the planet!
- Low service rates!
- 400dpi resolution
- Auto roll switching
- Self diagnostic system
- Accepts originals up to 1/16" thick
- Bypass for sheet fed copying functions

Technical Specs:

- 36" CCD @ 400dpi
- 36" LED Electrostatic printing technology
- Max. print length: 50'
- 25%-400% enlarge/reduce via copier
- 5%-3600% enlarge/reduce via controller
- Power: 115V, 20A
- Dimensions: 54" Wide
20" Deep
45" High

The model 2900 offers all the functionality of larger systems at a fraction of the cost. It can be used as a stand alone copier or as a fully integrated imaging system connected to your network. Enhanced image manipulation features allow you to enlarge or reduce documents up to 3600 percent or down to 5 percent which means you can convert "A" size originals to "E" size prints and vice versa in a single time saving step.
